OBJECTIVE

- Eager to launch a successful career by applying my programming and data analysis skills, collaborating with diverse teams, and contributing to innovative projects that drive continuous improvement in dynamic environments.

SKILL SET

- **Front-End Technologies** : HTML/CSS , JavaScript, React, Angular
- **Back-End Technologies** : Node/Express Js, Spring Boot, Java
- **Databases:** Mongo dB, MySQL • **Data Analytics** : Power BI

PROJECTS

Cric Store :

- Created a dynamic, responsive e Commerce **application** (Cric Store) for buying and selling cricket products, using Angular for the **front-End** and **Spring Boot** for the back end.
- Integrated **user Authentication** and role based authorization using **Spring Security** and **JWT**, allowing customers to securely sign up, log in, and manage their profiles

Expense Tracker :

- Developed a full-stack Expense Tracker app using Node.js, Express, MongoDB, and JWT, enabling users to securely track, categorize, and visualize their spending.
- Integrated budgeting insights and data visualization with Chart.js for a mobile-responsive, user-friendly experience

Calculator :

- Developed a basic calculator app to perform arithmetic operations (addition, subtraction, multiplication, division, modulo) based on user input, using input fields and buttons for easy interaction and real-time calculations.

Registration and Login Form :

- Created a secure registration and login system using Node.js, Express, and MongoDB, with password protection using bcrypt and session management via JWT.
